۲

Honors Chemistry

Period 5

- Stoich Round Robin
- Concentration is defined as:
 - > A given amount of a solute in moles dissolved in a specific amount of solvent
 - > There are two methods of dissolving a solute in solution

- Molarity (M)

- « Moles of solute dissolved in a known amount of solution
 - » Measured amount of solvent is added to measured amount of solute in moles

Period 5

* limiting reactants p492

* copy: stoich slides #91, 105 29, 40, 47, 52, 68, 73, 83, 108,

*

stoich slides #29, 40, 47, 52, 68, 73, 83, 108,

* Tues: test on stoich, *% yield, and limiting/excess reagents
